Re: Resolute FP US Inc.

Part 70 Operating Permit TV-2440-0005

Permit Renewal Application Response to April 24 Questions

Dear Ms. Buckner:

On behalf of Resolute FP US Inc., please find the attached response to questions that you requested by telephone on April 24, 2014 regarding the insignificant activity list in Attachment B of the permit. In general, tanks that have categorical exemptions because they contain air, water, or clean steam remained on the exemption list. Tanks in insignificant process areas (e.g., administration) also remained on the exemption list. Tanks containing fuels or petroleum liquids (i.e., oils) also remained on the exemption list. Most of the other tanks could be moved into each process area as noted in the attached table. Please note most of these tanks have no expected emissions of any regulated air pollutants.

If you have any questions, require further clarification, or need additional information regarding the application or this submittal, please do not hesitate to contact me.

Sincerely,

Steven R. Moore URS Corporation

Stever L. More
